AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

Cooling/cold storage operations: The organization cools and stores both organic and conventional product. The product arrives in boxes, bins or RPCs, is cooled then stored. The cooling process can include forced air (pressure tunnels), hydro vacuum (recirculated sodium hypochlorite solution at 1 - 20 ppm) and dry vacuum tube cooling, and/or ice-injector cooling (with a recirculated sodium hypochlorite solution at 1 - 20 ppm). If cooling is not required it goes directly into cold storage. Allergens are not handled at the facility. This facility is in operation from October to July. There were approximately 91 employees (over 2 shifts) working on the day of the audit.
